## **DETAILED ACTION**

### ***Priority***

1. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in France on 6 April 2004. It is noted, however, that applicant has not filed a certified copy of the foreign application (#0450686) as required by 35 U.S.C. 119(b).

### ***Specification***

2. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

### ***Claim Objections***

3. Claims 4-31 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, these claims have not been further treated on the merits.

### ***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
5. Claim 15 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. **Note:** A single claim which claims both an apparatus and the

process of using the apparatus is indefinite under 35 U.S.C. 112, second paragraph. *Ex parte Lyell*, 17 USPQ2d 1548 (Bd. Pat. App. & Inter. 1990).

6. Claims 16-31 are rejected for reasons of dependency upon claim 15.
7. Claims 30 and 31 provides for the use of system for automatic determination of the density of an object, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

***Claim Rejections - 35 USC § 101***

8. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

9. Claim 15 is rejected under 35 U.S.C. 101 because the claims are directed to neither a "process" nor a "machine," but rather embraces or overlaps two different statutory classes of invention set forth in 35 U.S.C. 101 which is drafted so as to set forth the statutory classes of invention in the alternative only. *Id.* at 1551.

Claims 16-31 are rejected for reasons of dependency upon claim 15.

Claims 30 and 31 are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd. App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

***Allowable Subject Matter***

10. Claims 1-3 are allowed.
11. The following is a statement of reasons for the indication of allowable subject matter:

With respect to claim 1, Bauer (DE 197 10 835 A1, cited by applicant), discloses a system for determination of the density of an object wherein radiation is transmitted through the object and the resulting attenuated beam is measured by a detector (abstract). Further, Bauer discloses a laser scanner for determining a significant dimension of the object (laser scanner measuring thickness, abstract). However, Bauer does not disclose the claimed means for adjusting the position of the object relative to the apparatus for determining the density of the object, wherein the adjustment has a precision on the order of one micron.

Claims 2 and 3 are allowable for reasons of dependency.
